

Firm Foundation Course

Statement of Aims:

Firm Foundation Course prepares students for various school examinations, particularly in core subjects. We tutor students from when they start to read up till the end of Sixth Form.

We prepare students for KS1 & KS2 SATs, 11+, 12+ or 13+ Transfer Tests for Grammar Schools, GCSE & GCE Core Subjects (Maths, English, Physics, Chemistry & Biology). We set homework on a regular basis and conduct regular tests for students. This helps the learner develop the confidence they need by the time the examination takes place.

Firm Foundation works with primary and secondary school students (KS1, KS2, KS3, KS4 and KS5) in a way that boosts their confidence and self esteem. We help students reach their true potential.

Firm Foundation believes parent involvement is also key to developing young learners. We get parents involved in helping learners at home. Whilst the tutors mark some of the students work, some work is also given to parents with the mark schemes to help their child mark their work.

Firm Foundation appoints suitable Specialist Teachers who are able to teach students at a very high standard. All our tutors are committed and reliable. All the tutors are DBS checked.

We maintain an environment where students are safe and can enjoy their sessions and learn effectively.

Other details:

Firm Foundation Course teaches students in line with the academic school term time. However, we also run pre-booked Half-Term and Summer Holiday sessions. We endeavour to make sure the tests we conduct do not clash with school tests. Average class sizes range from about 5 students to a maximum of 15 students attending on a weekly basis. We group students mainly by year group but we also make allowance for ability.

We maintain basic records to ensure our students are safe.

Venue for Tuition:

Firm Foundation Course runs sessions at:

Firm Foundation Centre

Unit 4 Cochran Close

Crownhill Industry

MK8 0AJ
